

Now Available with a Hogue® OverMolded™ Stock  
**New Ruger® Mini-14® Target Rifle**

MINI-14 TARGET RIFLE WITH  
HOGUE OVERMOLDED STOCK

MINI-14 TARGET RIFLE WITH  
GREY LAMINATED TARGET STOCK  
(SCOPE NOT INCLUDED)

### MINI-14 TARGET RIFLE - OVERVIEW:

The Mini-14 Target Rifle is perfect for today's rapid-fire action shooting competition events, such as the Shooting Industry Masters Tournament. Now the performance of the original Mini-14 Target Rifle is also available with a Hogue® OverMolded™ stock featuring a cobblestone texture that aids grip and control of the rifle under competitive conditions. This new version maintains the great features of the original Mini-14 Target Rifle including a heavyweight, hammer forged barrel with a recessed target crown, adjustable harmonic dampener, integral scope bases, and Ruger scope rings at no additional charge.

#### Hammer Forged Barrel

Features a distinctive heavyweight, hammer forged stainless steel target barrel with a recessed target crown.

#### Harmonic Dampener

Shooters can "tune" the rifle to obtain the best accuracy from their choice of ammunition by turning the dampener on the barrel. One-inch groups of 100 yards can be regularly obtained with suitable ammunition for the individual rifle.

#### Hogue® OverMolded™ Synthetic Stock

Overmolding, a patented process, provides a comfortable, non-slip, super smooth attractive finish that is durable and extremely quiet. The exclusive cobblestone texture further enhances the stocks by providing an efficient non-slip, non-irritating stippling pattern.

#### Patented Scope Bases

The Ruger scope bases are machined directly into the receiver and can never shoot loose. A set of stainless steel Ruger scope rings, a \$80.00 value, is included free with each Mini-14 Target Rifle.
